Education

Bachelor's Degree in Software Engineering
Bauman Moscow State Technical University (BMSTU)
2024 - 2028 • Currently studying

Experience

TEAM LEAD / BACKEND DEVELOPER
Project-Based Work

Led the development of a mobile application to enhance coffee chain staff efficiency. Built a comprehensive solution featuring KPI tracking, gamification, motivation systems, a knowledge base, and analytical tools for management, with a flexible role model.

Directed the development of custom e-commerce solutions for small businesses, specifically leading the creation of a dedicated web store application tailored for a natural pet food retailer.

Tecnologies: **Python, FastAPI, PostgreSQL, Redis, CI/CD.**

BACKEND DEVELOPER
letsscale

Contributed to the development of a **scientific paper generation service** for Russian Universities. Designed and built the underlying neural network pipeline for processing experimental data.

Tecnologies: **Python, FastAPI, SQLAlchemy, Pydantic, LangChain, Ray, S3**

AREAS OF EXPERTISE

LLM Implementation

Experience integrating large language models into user-facing services.

Integrations

Experience integrating with external APIs, including payment systems (e.g., YooKassa, SBP).

DevOps & Tools

CI/CD (pipeline development),
Docker (containerization),
GitHub Actions,
Application containerization.

Web Development

Backend architecture & API design
Database architecture
